WYANT BLUE-BLOOD ROSES

Wyant Roses are good three-year-old bushes that have been grown by specialists with loving care. They are dug properly as soon as they are well ripened, and they are shipped in wet moss to keep them in perfect condition until they reach you. Continue treating them as living things. Digging and shipping begins about mid-October and orders are filled in rotation of receipt.

PLEASE DO NOT DRIVE IN
EXPECTING YOUR ORDER TO
BE DUG AT ONCE.

You and Your Roses

You want to get the most out of your Roses. Your fall planting will give you the results you anticipate the very first season. Fall planting makes plants bloom better and earlier than spring planting does. Soil and weather conditions are generally much better in the fall and you run less danger of losing plants set out then. But be sure you read and follow the simple but important planting directions which are sent with each order.

WYANT ROSES *produce satisfaction*

WYANT ROSES are all three-year, field-grown budded bushes of the highest quality. Having been raised in the severe climate of Northern Ohio by Rose Specialists, they will produce satisfaction in your garden if given a chance.

Fall-Planted Roses are Best

Leading rosarians agree that fall is the ideal time to plant Roses. Wintering in the ground is Nature's way and results in earlier and larger blooms and more of them. Our Roses are dug when the season's growth has been completed and they are shipped to you at the proper time—October or November. At this time the soil is usually more mellow and easier to work. You can prepare it when convenient and let lay till plants arrive. Poor soil can be greatly improved by adding up to $\frac{1}{3}$ peat or humus. Roses like good soil.

PLANTING INSTRUCTIONS

Keep the roots moist all the time before planting.

Spread out the roots so they do not crowd; cover them with good soil and firm the earth about them, eliminating all air pockets.

Plant 15 to 18 inches apart, where there is sunshine at least half a day.

Mound soil about 10 inches high immediately after planting, to keep the moisture in the branches.

PLANT FLORIBUNDA ROSES

This is a class of Rose that is becoming very popular, and justly so. The clusters of blossoms are in bloom almost continuously. They are very fool-proof, for they require little or no winter protection, almost no pruning and they are quite free from disease. The plants should be set 18 to 24 inches apart, and a mass of one variety is more effective than to mix them.

Use them as borders, hedges, as foundation plantings or for a colorful corner. They are also very effective mixed in Hybrid Tea beds or perennial borders.
